INTRODUCIION

From series of experimentations conducted over 20 years, I found that the main hurdle of learning and teaching any subject of any standard is the lack of reading skills and that the only way to overcome this hurdle is to learn pronouncing skills. Towards the end of 2020, I developed the **Concept of Sub-Syllables** in English language which is a new system of learning English pronouncing skills efficiently. By applying the Concept of Sub-Syllables in English language, I have developed a **New English Pronouncing Skills Training Format**. By applying Mathematics and the Concept of Sub-Syllables in English language, I have formulated the general rules of English pronunciation which produce a single pronunciation to every word in an English dictionary without giving any specific preference to British or American accent. If a word has more than one pronunciation, then the preferred pronunciation is underlined. Some words of foreign origin are pronounced in two ways. The first way is from the Oxford Advanced Learner's Dictionary (10th Edition) and the second way is from the Cambridge Advanced Learner's Dictionary (4th Edition) which brings out the different ways of pronunciation by the two standard dictionaries. This article covers all the aspects of English pronunciation. I'm claiming that if any person can pronounce every word of this article, then he/she will be able to pronounce every word correctly in Cambridge Advanced Learner's Dictionary (4th Edition) and Oxford Advanced Learner's Dictionary (10th Edition).

I. **Concept of Sub-Syllables** (in English language).

A sub-syllable is defined as an alphabet/letter or group of alphabet/letters which forms a part of a syllable (if the word is multi-syllable)/monosyllable. The possible sounds of every sub-syllable are finite and that the sound of every sub-syllable depends on the parts of speech, structure and origin of a word. The sub-syllables include all the sounds of vowels (monophthong/diphthong/triphthong) and consonants (voiced and voiceless). The **Concept of Sub-Syllables** is a new system for learning English pronunciation efficiently. It has enabled to pronounce every word in an English dictionary correctly and easily, indicates and explains the silence of sounds when pronouncing some words, identifies different words having the same pronunciation and different words with similar pronunciations, has enabled to pin-point the differences between the British and American English pronunciations. It has enabled to explain how the letter-r and l control the vowel sounds and how the vowel sounds control r-sound in British pronunciation. By applying, Mathematics and the Concept of Sub-Syllables, I have formulated the general rules of English pronunciation which give a single pronunciation to every word in an English dictionary without giving any specific preference to British or American accent. If a word has more than

one pronunciation, then the preferred pronunciation is underlined. The underlined pronunciation of a word indicates the maximum number of correct letters of the spelling of the word. It has paved a new way to non-native speakers to learn English pronouncing skills without strictly following the British or American accent, which can be understood by the native speakers. Significantly, it has enabled to write the spellings of all the IPA/sound of sub-syllables and syllables of foreign origin reflected in English language. The Concept of Sub-Syllables is applicable to any existing language in the world and could herald the beginning of learning foreign languages in a new way. The applications of the Concept of Sub-Syllables in English language are reflected in this article which covers all general aspects of teaching and learning of the English pronunciation. The main objective of this article is to enable both the students and teachers learn to pronounce all the sounds of IPA and sub-syllables/syllables of foreign origin related to English language correctly and easily.

II. Primary Sounds of English Alphabet

The first step of learning English pronouncing skills is to pronounce and hear the primary sounds of English alphabet distinctly and correctly. The primary sounds of English alphabet are the sounds which we pronounce the letters in spelling of a word/abbreviation. The vowels of the primary sounds are classified on the basis of monophthong and diphthong, and that of consonants (actually, of the phonetic sounds) are broadly classified on the basis of voiced and voiceless.

Primary sounds of English alphabet.

a (ay)	b (bee)	c (see)	d (dee)	e (ee)	f (ef)
g (jee)	h (aych)	i (I)	j (jay)	k (kay)	l (el)
m (em)	n (en)	o (oh)	p (pee)	q (kyoo)	r (ahr)
s (es)	t (tee)	u (yoo)	v (vee)	w (<u>du</u> b-uhl- <u>yoo</u>)	
x (eks)	y (wy)	z (zed/zee)			

III. Construction, Spellings and classification of English IPA.

(i) Construction of the sounds of English IPA

- The author's phonetic sounds are constructed using the letters - a, e, h, i, o, u, w, y.
- There is a major shift in pronouncing English IPA of consonants by applying the concept of sub-syllables (using the sound of faint schwa-*uh*). The faint schwa is used after a consonant if it is before a vowel sound and before the consonant if it is after a vowel sound.
- The sound of [e/ɛ] (written as e in the spelling) and [æ] (written as a in the spelling) in the spelling of the pronunciation are both short and frontal vowel sound (monophthong), the only difference is that the sound of [æ] is produced with mouth open wider than that of [e/ɛ]. For simplicity, the phonetic sound (Author's) of [e/ɛ] and [æ] are pronounced as *auh* (short& low) and *ahuh* (short&high) respectively.

The sound of [ɑ:] (written as ah in the spelling) in the spelling of the pronunciation is a long (monophthong), back vowel sound and is produced with mouth wide open.

The sound of [ɑ:] is pronounced as ahh (long & high).

- d) The sound of [i:] (written as ee in the spelling) in the spelling of the pronunciation is long (monophthong), high, close and frontal vowel sound. The sound of [ɪ] (written as i in the spelling) in the spelling of the pronunciation is short (monophthong), low, close-mid and frontal vowel sound. For simplicity, the phonetic sound (Author's) of [i:] and [ɪ] are pronounced as ee (long&high)(which is the primary sound of the vowel - e) and euh (short&low) respectively. The sound of [i](written as i in the spelling) in the spelling of the pronunciation is short (monophthong), high, close-mid and frontal vowel sound. For simplicity, the phonetic sound (Author's) of [i] is pronounced as ehuh (short &high).

- e) The sound of [ə](full schwa) and [ɚ] (faint schwa) in the spelling of the pronunciation are both short and central vowel sound, the only difference is that the sound of [ɚ] is produced little shorter than that of [ə]. For simplicity, the phonetic sound (Author's) of [ə] and [ɚ] are written as uh (short&low) and uh (shorter and low) respectively.

The sound of [ə](written as uh in the spelling) and [ʌ](written as u in the spelling) in the spelling of the pronunciation are both short(monophthong) and mid- vowel sound, the difference is that the sound of [ʌ] is a back vowel sound and is produced mouth little more open than that of [ə] which is a central vowel sound. For simplicity, the phonetic sound (Author's) of [ə] and [ʌ] are pronounced as uh (short&low) and uhh (short and high) respectively.

The sound of [ə] (written as uh in the spelling) and [ɜ:]/[ɝ:](written as uuhh/ur in the spelling) in the spelling of the pronunciation are both central and mid-vowel sound, the difference is that the sound of [ɜ:]/[ɝ:] (long and monophthong) is produced with mouth little more open than the sound of [ə](short and monophthong). For simplicity, the phonetic sound (Author's) of [ə] and [ɜ:]/[ɝ:] are pronounced as uh(short&low) and uuhh/uuhhr (long and high) respectively.

- f) The sound of [ɒ](written as o in the spelling) is a short (monophthong), back vowel sound and is produced with mouth wide open. Using the concept of sub-syllables, the sound is pronounced as ouh (short).

The sound of [ɔ:](written as aw in the spelling) is a long (monophthong), open-mid and back vowel sound. For simplicity, the sound is pronounced as oo (long).

The sound of [ɔ] (written as **aw** in the spelling) is a short (monophthong), open-mid and back vowel sound. For simplicity, the sound is pronounced as oo (short).

The sound of [u:](written as oo in the spelling) is a long (monophthong), close and back vowel sound. For simplicity, the sound is pronounced as uhwoo (long).

The sound of [u](written as uu in the spelling) is a short (monophthong), close and back vowel sound. For simplicity, the sound is pronounced as uhwu (short).

The sound of [ʊ](written as uu in the spelling) is a short (monophthong), close and near back vowel sound. For simplicity, the sound is pronounced as uhwu (short).

The sound of [əʊ]/[oʊ] (written as oh in the spelling) is a diphthong, open-mid and back vowel sound. For simplicity, the sound is pronounced as uhuhwu/ouhwu which is the primary sound of the vowel - o.

g) The sound of [ɔɪ] (written as oi in the spelling) and [aʊ] (written as ou in the spelling) are both diphthong. The sound of [aʊ] is produced with the mouth more wide open than that of [ɔɪ]. For simplicity, the sound of [ɔɪ] and [aʊ] are pronounced as *ouhy* and *ahhuhwu* respectively. The sound of [eɪ] (written as ay in the spelling) and [aɪ] (written as I/y in the spelling) are both back vowel sound and diphthong. The sound of [aɪ] is produced with the mouth more wide open than that of [eɪ]. For simplicity, the sound of [eɪ] and [aɪ] are pronounced as *auhy* (which is the primary sound of the vowel - a) and *ahhuhy* (which is the primary sound of the vowel - i) respectively.

(ii). The spellings of English IPA/the corresponding letter(s) in the spellings of pronunciation/classification of vowels & consonants.

The spellings of English IPA/the corresponding letter(s) in the spellings of pronunciation/classification of vowels & consonants by applying the Concept of Sub-Syllables. All vowels are voiced whereas some consonants are voiced and other consonants are voiceless.

Monophthongs (Long and Short Vowels)

[i:] (ee)/(ee) /(long&high)	[ɪ] (euh)/(i) /(short&low)	[ʊ] (uhwu)/(uu) /(short)	[u:] (uhwoo)/(oo) /(long)
[e/ɛ] (auh)/(e) /(short&low)	[ə] (uh)/(uh) /(short&low)	[ɜ:/ɝ:] {uuhh(r)}/(uuhh/ur) /(long&high)	[ɔ:] (oo)/(aw) /(long)
[æ] (ahuh)/ (a)/(short&high)	[ʌ] (uhh)/(u) /(short&high)	[ɑ:] (ahh)/(ah) /(long&high)	[ɒ] (ouh)/(o) /(short)

Note; [i] (euh)/(i)/(short&high), [ɛ] (uh)/(uh)/(shorter&low), [ə] / [ɚ] {uh(r)}/{uh(r)/uhr} (short&low), [u] (uhwu)/(uu), [ɔ] (oo)/(aw)/(short).

Diphthongs

[ɪə] (euhuh)/(iuh)	[eɪ] (auhy) / (ay)	
[ʊə] (uhwuuh)/(uuuh)	[ɔɪ] (ouhy)/(oi)	[əʊ]/[oʊ] {(uhuhwu)/(ouhwu)}/(oh)
[eə] (auhuh)/(euh)	[aɪ] (ahhuhy)/(I/y)	[aʊ] (ahhuhwu)/(ou)

Note; [eɪ] / [er] {auhuh(r)}/(auhr) {euh(r)}/(er), [ɪə] / [ɪr] {euhuh(r)}/(euhr) {iuh(r)}/(ir)
[ʊə] (uhwuuh)/(uuuh) [ju] (juhwu)/(yuu) [ju:] (yuhwoo)/(yoo), [jʊ] (yuhwu)/(yuu),
[jə] (yuhuh)/(yuh)

Triphthongs

[aɪə] (ahhuhuh)/(luh),	[aʊə] (ahhuhwuuh)/(ɔɪə) (ouhyuh)/(oiuh),
(ouuh),	
[eɪə] (auhyuh)/(ayuh),	[əʊə]/[oʊə] {(uhuhwuuh)/(ouhwuuh)}/ (ohuh)

Note; [jʊə] (yuhwuuh)/(yuuuh)

Consonants

pairs: [p] (<i>puh/uhp</i>)/(p) /(voiceless),	[b] (<i>buh/uhb</i>)/(b) /(voiced);	[tʃ] (<i>chuh/uhch</i>)/(ch) /(voiceless),	[dʒ] (<i>juh/uhj</i>)/(j) /(voiced);
[t] (<i>tuh/uht</i>)/(t) /(voiceless),	[d] (<i>duh/uhd</i>)/(d) /(voiced);	[f] (<i>fuh/uhf</i>)/(f) /(voiceless),	[v] (<i>vuh/uhv</i>)/(v) /(voiced);
[k] (<i>kuh/uhk</i>)/(k) /(voiceless),	[g] (<i>guh/uhg</i>)/(g) /(voiced);	[s] (<i>suh/uhs</i>)/(s) /(voiceless),	[z] (<i>zuh/uhz</i>)/(z) /(voiced);
[ʃ] (<i>shuh/uhsh</i>)/(sh) /(voiceless),	[ʒ] (<i>zhuh/uhzh</i>)/(zh) /(voiced	[θ] (<i>thuh/uhth</i>)/(th) /(voiceless),	[ð] (<i>thuh/uhth</i>)/(th) /(voiced);

Singles: [m] (<i>muh/uhm</i>)/(m) /(voiced&nasal),	[n] (<i>nuh/uhn</i>)/(n) /(voiced&nasal),	[ŋ] (<i>uhng</i>)/(ng) /(voiced&nasal),
[h] (<i>huh</i>)/(h) /(voiceless),	[l] (<i>luh/uhl</i>)/(l) /(voiced),	[r] (<i>ruh/uhr</i>)/(r) /(voiced),
[w] (<i>wuh</i>)/(w) /(voiced),	[j] (<i>yuh/uhy</i>)/(y) /(voiceless).	

Note; [t̬] (*duh/uhd*)/(t̬)/(voiced), [ks] (*uhkuhs*)/(ks)/(voiceless), [ts] (*tuhsuh/uhthuhs*)/(ts)/(voiceless), [x] (*khuh/uhkh*)/(x)/(voiceless).

Note;(a) Most of the English IPA/symbols are reflected in the primary sounds of alphabet (IPA transcriptions): æ,ɑ:, aɪ, aɪə, aʊ, aʊə, b, d, dʒ, e/ɛ, e:, eə/er, eɪ, eɪə, f, i, i:, ɪ, ɪə, j, jə, ju, ju:, jʊ,jʊə, k, l, m, n, ɒ,p, r, s, t, tʃ, ʃ, ə, ʌ, ə/ə, əʊ/oʊ, əʊə/oʊə, u, u:, ʊ, ʊə, v, w, z, ʒ.

(b) English IPA/sounds that are not reflected in the primary sounds of alphabet

(IPA transcriptions): g, h, ʒ:/ʒ:,ɔ, ɔ:, ɔɪ,ɔɪ:, ɔɪə, ɲ, t̬, θ, ð,

(c) Additional IPA/sounds of foreign origin reflected in English language: à,á, â, ä, ã, æ:, ã:,ã:, ç, é, è, ê, eɪ:, eɪə, hw,ï, kn, kʃ, ñ, ɲ, ʳ, ʳ, ʳ, ʳ, ô, õ, ó,ö, œ,ù, û, ü, vwaɪ,wæ, wa:, wei, x, jei, jəʊ/joʊ, jʒ:/jʒ:,

(d) Most of the vowel phonetic symbols (before the introduction of IPA in English pronunciation) are modified which correspond uniquely to the sounds of IPA reflected in English language and that all the words in an English dictionary are pronounced without using IPA transcription of vowels(except [e] and [i]) and some consonants(except flap t sound: [t̬] reflected only in American pronunciation and the sound: x (*khuh/uhkh*)[x] reflected in foreign origin words).

(e) It is not possible to learn English pronunciation efficiently without knowing the sounds of English IPA. However, it is possible to learn the sounds of English IPA without knowing the symbols/transcriptions of English IPA by applying the Concept of Sub-Syllables.

(f) Knowledge of the sounds of English IPA will enhance the learning of local dialects, regional languages, national languages and even foreign languages.

(g) **Primary sounds of English alphabet (IPA transcriptions & Spellings).**
