INTRODUCTION

From series of experimentations conducted over 20 years, I found that the main hurdle of learning and teaching any subject of any standard is the lack of reading skills and that the only way to overcome this hurdle is to learn pronouncing skills. Towards the end of 2020, I developed the Concept of Sub-Syllables in English language which is a new system of learning English pronouncing skills efficiently. By applying the Concept of Sub-Syllables in English language, I have developed a **New Model of Spelling Bee Competition** which is applicable to all the students of any standard. Spelling Bee Competition is the most effective literary activity for learning English pronouncing skills.

1. **Concept of Sub-Syllables** (in English language).

A sub-syllable is defined as an alphabet/letter or group of alphabet/letters which forms a part of a syllable (if the word is multi-syllable)/monosyllable. English is a non-phonetic language. However, the possible sounds of every sub-syllable are finite and that the sound of every sub-syllable depends on the parts of speech, structure and origin of a word. The sub-syllables include all the sounds of vowels (monophthong/diphthong/triphthong) and consonants (voiced and voiceless). The **Concept of Sub-Syllables** is a new system for learning English pronunciation efficiently. It has enabled to pronounce every word in an English dictionary correctly and easily, indicates and explains the silence of sounds when pronouncing some words identifies different words having the same pronunciation and different words with similar pronunciations, has enabled to pin-point the differences between the British and American English pronunciations. It has enabled to explain how the letter-r and l control the vowel sounds and how the vowel sounds control r-sound in British pronunciation. By applying, Mathematics and the Concept of Sub-Syllables, I have formulated the general rules of English pronunciation which give a single pronunciation to every word in an English dictionary without giving any specific preference to British or American accent. If a word has more than one pronunciation, then the preferred pronunciation is underlined. The underlined pronunciation of a word indicates generally the maximum number of correct letters of the spelling of the word. It has paved a new way to non-native speakers to learn English pronouncing skills without strictly following the British or American accent, which can be understood by the native speakers. Significantly, it has enabled to write the spellings of all the IPA/sound of sub-syllables and syllables of foreign origin reflected in English language. The Concept of Sub-Syllables is applicable to any existing language in the world and could herald the beginning of learning foreign languages in a new way. The applications of the Concept of Sub-Syllables in English language are reflected in this article which covers all general aspects of teaching and learning of the English pronunciation. The main objective of this article is to enable both the students and teachers

learn to pronounce all the sounds of IPA and sub-syllables/syllables of foreign origin related to English language correctly and easily.

1. Primary Sounds of English Alphabet

The first step of learning English pronouncing skills is to pronounce and hear the primary sounds of English alphabet distinctly and correctly. The primary sounds of English alphabet are the sounds which we pronounce the letters in spelling of a word/abbreviation. The vowels of the primary sounds are classified on the basis of monophthong and diphthong, and that of consonants (actually, of the phonetic sounds) are broadly classified on the basis of voiced and voiceless.

Primary sounds of English alphabet.

a (ay)	b (bee)	c (see)	d (dee)	e (ee)	f (ef)
g (jee)	h (aych)	i (I)	j (jay)	k (kay)	l (el)

x (eks)	y (wy)	z (zed/zee)			

2. Construction, Spellings and classification of English IPA.

(i) Construction of the sounds of English IPA

- The author's phonetic sounds of vowels are constructed using the letters - a, e, h, i, o, u, w, y.
- There is a major shift in pronouncing English IPA of consonants by applying the concept of sub-syllables (using the sound of faint schwa-uh). The faint schwa is used after a consonant if it is before a vowel sound and before the consonant if it is after a vowel sound.
- The sound of [e] (written as e in the spelling) in the spelling of the author's pronunciation is a short, close-mid, high-mid and frontal vowel sound (monophthong). The sound of [æ] (written as a in the spelling) in the spelling of the author's pronunciation is a short, open-mid, low-mid and frontal vowel sound (monophthong). The sound of [e] is close-mid and that of [ɛ] is open-mid where as the sound of [æ] is produced with mouth open little wider than that of [ɛ]. For simplicity, the phonetic sound (Author's) of [e] and [æ] are pronounced as *auh* (short& high-mid) and *ahuh* (short&low-mid) respectively. The sound of [ɑ:] (written as ah in the spelling) in the spelling of the pronunciation is a long (monophthong), open, low and near back vowel sound. The sound of [ɑ:] is pronounced as *ahh* (long & low).
- The sound of [i:] (written as ee in the spelling) in the spelling of the author's pronunciation is a long (monophthong), close, high and frontal vowel sound. The sound of [i] (written as i in the spelling) in the spelling of the author's pronunciation is a short (monophthong), close (open little wider than [i:]), high (pronounce little lower than [i:]) and frontal vowel sound. For simplicity, the phonetic

sound (Author's) of [i:] and [i] are pronounced as ee (long&high)(which is the primary sound of the vowel - e) and *eu*h (short&high) respectively. The sound of [i](written as *i* in the spelling) in the spelling of the author's pronunciation is a short (monophthong), close, high and frontal vowel sound. For simplicity, the phonetic sound (Author's) of [i] is pronounced as *eh*uh (short &high).

- e) The sound of [ə](full schwa) and [ɚ] (faint schwa) in the spelling of the author's pronunciation are both short, mid and central vowel sound, the only difference is that the sound of [ɚ] is produced little shorter than that of [ə]. For simplicity, the phonetic sound (Author's) of [ə] and [ɚ] are written as *uh* (short&mid) and *uh* (shorter and mid) respectively.

The sound of [ʌ](written as *u* in the spelling) in the spelling of the author's pronunciation is a short (monophthong), open-mid, low-mid and near back vowel sound. The sound of [ʌ] is produced with mouth little more open and pronounced little lower than that of [ə].

For simplicity, the phonetic sound (Author's) of [ə] and [ʌ] are pronounced as *uh* (short & mid) and *uhh* (short and mid) respectively.

The sound of [ɜ:]/[ɝ:](written as *uuh*h/*ur* in the spelling) in the spelling of the author's pronunciation is a long(monophthong), open-mid, low-mid and central vowel sound. The sound of [ɜ:]/[ɝ:] is produced with mouth little more open and pronounced little lower than that of [ə].

For simplicity, the phonetic sound (Author's) of [ə] and [ɜ:]/[ɝ:] are pronounced as *uh*(short& mid) and *uuh*h/*uuh*h (long and mid) respectively.

- (f) The sound of [ɒ](written as *o* in the spelling) in the spelling of the author's pronunciation is a short (monophthong), close, low and back vowel sound. Using the concept of sub-syllables, the sound is pronounced as *ou*h (short). The sound of [ɔ:](written as *aw* in the spelling) in the spelling of the author's pronunciation is a long (monophthong), open-mid, low-mid and back vowel sound. For simplicity, the sound is pronounced as *oo* (long). The sound of [ɔ] (written as ***aw*** in the spelling) in the spelling of the author's pronunciation is a short (monophthong), open-mid, low-mid and back vowel sound. For simplicity, the sound is pronounced as *oo* (short). The sound of [u:](written as *oo* in the spelling) in the spelling of the author's pronunciation is a long (monophthong), close, high and back vowel sound. For simplicity, the sound is pronounced as *uh*woo (long and high). The sound of [u](written as *uu* in the spelling) in the spelling of the author's pronunciation is a short (monophthong), close, high and back vowel sound. For simplicity, the sound is pronounced as *uh*woo (short and high). The sound of [ʊ](written as *uu* in the spelling) in the spelling of the author's pronunciation is a short (monophthong), close, high and near back vowel sound. For simplicity, the sound is pronounced as *uh*woo (short and high). The sound of [əʊ]/[oʊ] (written as *oh* in the spelling) in the spelling of the author's pronunciation is a (diphthong, mid and central vowel sound)/ (diphthong, close-mid, high-mid and back vowel sound). For simplicity, the sound is pronounced as *uh*hwoo/*ou*hwoo which is the primary sound of the vowel - o.
- (g) The sound of [ɔɪ](written as *oi* in the spelling) in the spelling of the author's pronunciation is a diphthong, open-mid, low-mid and back vowel sound. The sound of [aʊ] (written as *ou* in the spelling) in the spelling of the author's pronunciation is a (diphthong, open, low and central vowel sound)/ (diphthong, open-mid, low-mid and front vowel sound). For simplicity, the sound of [ɔɪ] and [aʊ] are pronounced as *ou*hy and *ah*hwoo/*ah*hwoo respectively. The sound of [eɪ](written as *ay*

in the spelling) in the spelling of the author's pronunciation is a diphthong, close-mid, high-mid and frontal vowel sound. The sound of [aɪ] (written as I/y in the spelling) in the spelling of the author's pronunciation is a diphthong, open, low and frontal vowel sound. The sound of [aɪ] is produced with the mouth more wide open than that of [eɪ]. For simplicity, the sound of [eɪ] and [aɪ] are pronounced as *auhy* (which is the primary sound of the vowel - a) and *ahhuhy* (which is the primary sound of the vowel - i) respectively.

(ii). English IPA/the spellings of English IPA/the corresponding Author's phonetic symbols in the spellings of pronunciation/classification of vowels & consonants.

English IPA/The spellings of English IPA/the corresponding Author's phonetic symbols in the spellings of pronunciation/classification of vowels & consonants by applying the Concept of Sub-Syllables. All vowels are voiced whereas some consonants are voiced and other consonants are voiceless.

II. New Model of Spelling Bee Competition

The central idea of the new model: The judges give British pronunciation (BPrn) and American pronunciation (APrn), parts of speech and the origin of every word without giving the meaning of the word. I have found that the correlation between the spelling of every word and the pronunciation of the word. The spelling of every word depends only on the pronunciation of the word. The pronunciation of every word in an English dictionary depends on the sound of sub-syllables/syllables which depends on the parts of speech, structure and origin of the word and that every word in an English dictionary can be pronounced without knowing the meaning of the word. By applying Mathematics and the Concept of Sub-Syllables in English language, I have formulated the general rules of English pronunciation which produce a single pronunciation to every word in an English dictionary without giving any specific preference to British or American accent. If a word has more than one pronunciation, then the preferred pronunciation is underlined. The underlined pronunciation of a word indicates the maximum number of correct letters of the spelling of the word.

For formulating and producing the New Model of Spelling Bee Competition, the sample gives explicitly the pronunciation of all the words of Cambridge Advanced Learner's Dictionary (4th Edition) and Oxford Advanced Learner's Dictionary (10th Edition) with a lot of foreign words from other dictionaries. Most of the vowel phonetic symbols and some of the consonant phonetic symbols (before the introduction of IPA in English pronunciation) are modified which correspond uniquely to the sounds of IPA reflected in English language and are used in the spelling of the pronunciation of words instead of using IPA transcriptions. Two IPA consonants: [ɾ] (flap t sound) reflected only in American pronunciation and [x] reflected in foreign origin words are retained in the spelling of the pronunciation of words. The sample of the competition gives British pronunciation (BPrn), American pronunciation (APrn), parts of speech, preferred underlined pronunciation and the origin of every word as reference points to write the spelling of the word. The British pronunciation (BPrn) and American pronunciation (APrn) are taken from Cambridge Advanced Learner's Dictionary (4th Edition) and Oxford Advanced Learner's Dictionary (10th Edition). So, while preparing for Spelling Bee Competition, the participants shall first memorise the pronunciation of the underlined pronunciation and then the spelling of the word. The new model could be effectively used for conducting Spelling Bee Competition for every standard of students involving large number of participants in any part of the world.

III. Main points of the Model.

1. The letter-a in the pronunciation of a word takes the sound (ahuh)[æ] in both BPrn and APrn. Illustrations: a cappella (ə-kuh-pel-uh/əh-kuh-pel-uh)<It>, actor (ak-tuh/ak-tuhr)(n), actress (ak-truhs)(n), Adriatic (əy-dri-at-ik/əd-ri-at-ik)(adj), aghast (uh-gahst/uh-gast)(adj), agitprop (aj-it-prop/aj-it-prahp)<Rus>, apathy (ap-uh-thi)<Gk>, Apatosaurus (ap-uh-tuh-saw-ruhs/ap-uh-tu-sawr-uhs)<Gk>, aromatic (ar-uh-mat-ik/er-uh-mat-ik)(adj), arrant (ar-uhnt/er-uhnt)(adj), Asiatic (əy-zi-at-ik/əy-zi-at-ik)(adj), apathetic (ap-uh-thet-ik/ap-uh-thet-ik)(adj), barrel (bar-uhl)(n/v), barrister (bar-i-stuh/bar-i-stuhr)(n), barrow (bar-oh)(n), bastion (bas-ti-uhn)(n), bat (bat)(n/v), batch (bach)(n), bicameral (by-kam-uhr-uhl/by-kam-uhr-uhl)<Lat>, blasphemy (blas-fuh-mi)(n), blast (blahst/blast)(v), bypass (by-pahs/by-pas)(v/n),

2. The letter-oh in the pronunciation of a word takes the sound (uhuhwuu)[əʊ] (BPrn) and (ouhwuu)[oʊ] (APrn). Illustrations: borough (bur-uh/bur-oh)(n), borrow (bor-oh/bahr-oh)(v), borrower (bor-oh-uh/bor-oh-uhr/bahr-oh-uhr)(n), borrowing (bor-oh-ing/bahr-oh-ing)(n), boast (bohst)(v/n), boastful (bohst-fuhl)(adj), boat (boht)(n), bouquet (buu-kay/boh-kay)<Fr>, bowl (bohl)(n/v), bowler (boh-luh/boh-luhr)(n), bowling (boh-ling)(n), bravo (brah-voh/brah-voh)(exclm)<It>, brimstone (brim-stohn)(n), bronchiole (brong-ki-ohl/brahng-ki-ohl)<Lat>, brooch/broach (brohch)(n), buffalo (buf-uh-loh)(n), bungalow (bung-guhl-oh)<Hin>, bureau (byuuuh-roh/byuur-oh)<Fr>, burrow (bur-oh/bur-oh)(n/v), poetic (poh-et-ik/poh-et-ik)(adj), poetry (poh-i-tri/poh-uh-tri)(n), soul (sohl)(n), soulful (sohl-fuhl)(adj),

The letter-ohuh in the pronunciation of a word takes the sound (uhuhwuuuh)[əʊə] (BPrn) and (ouhwuuuh) [oʊə] (APrn). 4. The sound of ṭ. The letter- ṭ in the spelling of pronunciation (only in APrn) of a word takes a brief sound of d (duh/uhd) (voiced). The sub-syllable-t never takes the sound-ṭ in the American pronunciation if it is the first/last sub-syllable of a word. The sub-syllable- t takes the sound- ṭ in the American pronunciation if it is followed by the sound- i/i/oh/ou/uh/uh in the pronunciation of the word provided the sub-syllable is generally preceded by the voiced sound. All vowel sounds are voiced. Illustrations: abbreviated

18. Some words of foreign origin are pronounced in two ways; the first way is from the Oxford Advanced Learner's Dictionary (10th Edition) and the second way is from the Cambridge Advanced Learner's Dictionary (4th Edition). Illustrations: agent provocateur (azh-o pruh-vok-uh-tuuhh/azh-o pruh-vok-uh-tur/ahzh-ah proh-vah-kuh-tur)/(azh-ah pruh-vok-uh-tuuhh/azh-ah pruh-vok-uh-tur/ahzh-ah proh-vah-kuh-tur)<Fr>, aide-de-camp (ayd-duh-ko/ayd-duh-kamp)/(ayd-duh-kah/ayd-duh-kamp)<Fr>, avant-grade (av-o gahd/av-ah gahrd)/(av-ah gahd/av-ah gahrd)(adj)<Fr>, the avant-grade (thi av -o gahd/thi av -ah gahrd)/(thi av-ah gahd/thi av -ah gahrd)(n)<Fr>, bouffant (boo-fo/boo-fahnt)/(boo-fo/boo-fahnt)(adj)<Fr>, bouillon (boo-yon/boo-yo/boo-yahn)/(boo-yo/buul-yahn)<Fr>, bouquet (buu-kay)/(buu-kay/boh-kay)<Fr>, bourgeois (buuuh-zhwah/buuuh-zhwah/buur-zhwahz/buur-zhwahz)/(bawzh-wah/buurzh-wah)(adj)<Fr>, (the) bourgeoisie (buuuh-zhwah-zee/buurzh-wah-zee)/(bawzh-wah-zee/buurzh-wah-zee)<Fr>, capsule (kap-syool/kap-sool)/(kap-syool/kap-suhl)<Lat>, chignon (shee-nyon/shee-nyahn)/(shee-nyo/shee-nyahn)<Fr>, contretemps (kon-truh-to/kahn-truh-tah)/(kon-truh-to/kahn-truh-tah)[pl. contretemps (kon-truh-toz/kahn-truh-tahz)/(kon-truh-toz/kahn-truh-tahz)]<Fr>, cor anglais (kawr ong-glay/kawr awng-glay)/(kaw-rong-glay/kawr-ahng-glay)[pl. cors anglais (kawr ong-glay/kawr awng-glay)/(kaw-rong-glay/kawr-ahng-glay)]<Fr>, cordon bleu (kaw-do bluuh/kawr-dawn bluuh)/(kaw-do bluuh/kawr-dah bloo)(adj)<Fr>, denouement/dénouement (day-noo-mo/day-noo-mah)/(day-noo-mo/day-noo-mah)<Fr>, genre (zhoh-ruh/zhon-ruh/zhahn-ruh)/(zhah-ruh/zhon-ruh)(n/adj)<Fr>, petit bourgeois (pet-i buuuh-zhwah/pet-i buur-zhwah)/(pet-i baw-zhwah/puh-teeb uur-zhwah)(n/adj)<Fr>, rapprochement (ra-prosh-mo/ra-prohsh-mo/ra-prohsh-mahn/ra-prahsh-mahn)/(ra-prosh-mong/ra-prohsh-mahng)<Fr>, sangfroid (song-frwah/sahng-frwah)/(so-frwah/sahng-frwah)<Fr>, soupçon (soop-son/soop-sahn)/(soop-so/soop-sah)<Fr>.
19. The letters/IPA in the spelling of the foreign words are pronounced as follows:
à, á, â, ä ; ay (auhy)[eɪ]
ç; see [si:]
é, è, ê; ee [i:]
î, ï ; l (ahhuhy)[aɪ]
ñ; en [n]
ô, ó, ö ; oh (uhuhwu/ouhwu)[əʊ/ʊ]

œ; oh (uhuhwuu/ouhwuu)[əʊ/oo]-ee[i:]

ù, û, ü; yoo [ju:]

20. If a word has more than one spelling, then the speller of the competition will have to spell only one spelling of the word. Illustrations.
